

**The Model Pass:**

A simple workshop designed to encourage members of local community to come together to build a 3-D model of their plans for the Pass - in cardboard or cake. The simple act of seeing your community from above allows people to engage with its bigger issues - the cake is to dispel angst around architectural models. Potential to work with existing groups in the community who are concerned about housing issues.

**Technical Requirements:**

Materials for making models: glue, cardboard, scrap paper, markers, maps of street layout, some architectural expertise. Cake and melted chocolate!
